BOG 2014.2.12	To consider grant of Duty Leave to attend research exchange programme at CERN and other international level institutions
----------------------	---

Faculty members and Scientific Staff working in experimental high energy physics are regular visitors to different international level laboratories for experiments. As per the earlier decision of the Board, NISER joined CERN experiments. Currently some faculty members and scientific staff of School of Physical Sciences are involved in these experiments.

In order to keep a provision for these faculty members and scientific staff it is requested to grant them duty leave when they are visiting institutions like CERN and such institutions where NISER is a participating institution.

The Board approved the above said proposal with the following suggestions:

- 1. Teaching of Courses should not be hampered / affected.*
- 2. Vacation time may be chosen for this purpose.*
- 3. Scientific Officers/Officials may be allowed to go to these institutions / laboratories during the semester.*
- 4. Visiting these institutions/laboratories will be treated as Deputation/On duty.*
